#### SHIPPING INFORMATION.

Our prices do not include mailing or shipping costs. Small orders may be forwarded via parcel post, special handling, with postal charges collect. Larger orders are best shipped via Railway Express, express charges collect.

We can not safely ship orchid plants during cold weather. Your orders recieved during winter months are reserved for you to be shipped as soon as the weather allows in the spring.

#### QUANTITY DISCOUNTS.

ORDERS FOR \$25.00 worth of plants will recieve one extra \$5.00 plant free. This applies only to mail orders.

#### Substitutions.

We do not substitute unless you tell us that we may. If we have your permission to substitute for varieties ordered, which may be sold out, we always give you equal or greater value in other plants.

#### VISITORS WELCOME.

We are open to the public on weekends (SATURDAYS and SUNDAYS). If you wish to visit our nursery during the week, please make an appointment by phoning Glenwood 4-5651.

TO FIND OUR NURSERY: you drive west thru the adjoining towns of San Rafael, San Anselmo and Fairfax, then continue west six miles over Whites hill to San Geronimo and the Lagunitas School. Accross the street from the school and about one-half block west of the school, you turn south on Meadow Way, follow meadow way for one-half mile and you will come to our nursery.

We are located a few miles from the Samuel Taylor State Park with its big trees and picnic grounds with the old swimming hole. A sunday drive thru west Marin County will be enjoyed by the whole family.

## CATTLEYA HYBRID ORCHID PLANTS

*Brassocattleya Heatonensis*. Flowering size plants bearing large lavender to purple flowers with very large fringed lips. each. \$5.00

*Cattleya Empress Frederick*. Light to medium colored flowers with gold throats and gold veining in the large lips. Flowering size. each. 5.00

*Laelia-Cattleya Peggy Huffman*. Heavy textured large flowers, some plants bear flowers which have the tips of the petals splashed with dark purple. Lips purple color. Other plants of this variety have flowers with the splashed petals. Flowering size plants are \$5.00. Smaller plants are \$3.00 and \$4.00 each.

*Cattleya Georgie Aldridge*. This is a similar hybrid to the one listed above, except the plants do not grow as tall and the flowering season is usually during the fall. Flowering size plants are \$5.00. Smaller plants at \$3.00 and \$4.00 each.

*Laelia Tenebrosa x Cattleya Empress Frederick Aurea*. This hybrid has produced yellow to bronze flowers on those which have flowered to date. Season mainly spring months. plants in 2½ inch pots at \$2.50. 3 inch pots at 4.00/ Flowering size at \$5.00.

*Cattleya Forbesii*. A dwarf growing species from Brazil, this produces yellow to tan colored, medium size flowers during the summer and fall months. Blooming size \$5.00. Smaller plants at \$3.50.

*Laelia-Cattleya Archdeacon*. Medium to dark colored flowers during summer and fall months. Plants offered are in 3 inch pots and should flower within a year or so. This is a fast growing, prolific flowering hybrid. Each. \$4.00

\*\*\*\*\*

### *Dendrobium Speciosum*.

This orchid is called the rock lily or king orchid in its native country of Australia. It produces 2 foot spikes of cream colored flowers, each about 1½ inches across and a hundred or more per spike. This orchid can be grown with *Cymbidiums* as it likes cool nights during fall and winter months. Plants in three inch pots \$3.00 each.

### *Oncidium Sarcodes*.

One of the Dancing Lady orchids, this produces long spikes of very attractive golden yellow and brown flowers each about 1½ to 2 inches across. Flowers in the spring and summer months. Flowering size plants at \$5.00 each.

### *Dendrobium Mantinii*

A yellow flowered hybrid *dendrobium* which flowers during spring months. Flowers are borne at leaf axils in pairs or threes, golden yellow with deep purple blotch in the cup shaped lips. Flowering size at \$3.50

### *Dendrobium Wiganianum*.

Similar to above cross except the flowers are larger and the plants grow taller. A few of this hybrid *Dendrobium* will produce dark-purple flowers. Flowering size 4.00

### *Phalaenopsis Lady Rothschilds*

One of the Jungle moth Orchids, this produces small pink flowers shaped like Butterflies or moths. Easier to grow than the large flowered types. Plants in 2½ inch and three inch pots, will flower soon. \$2.50 each.

### *Cattleya Seedlings in 1½ inch pots*.

*C. Chamberlainiana x L. Zanthina*. A cross of a dark metallic red *Cattleya* and a bright yellow *laelia*, this should produce clusters of medium size flowers in several unusual colors and shades. Plants two years of age in 1½ inch pots at \$1.50 each.

*Cattleya Cowaniae*, large white. x to *Cattleya Chamberlainiana*, dark red variety. Another Hybrid which should produce some unusual colors. Plants in 1½ inch pots at \$1.50
